PROFESSIONAL PROFILE

I am an advanced Computer Engineering student at the National University of La Matanza. I am passionate about understanding how things work, solving problems, and creating technological solutions that simplify people's lives. I have a solid foundation in programming, data structures, algorithms, and databases. I consider myself a responsible, proactive, and curious person, eager to continue learning and growing professionally, and to make a meaningful contribution to every project I am part of.

WORK EXPERIENCE

ProContacto | September 2025 - Present
